

Team: Infinite Loopers

Team members

1. Noah Stasuik (44083343)
2. Trevor Winser (16216681)
3. Julie Flament (53203964)
4. Lakshay Dang (34951236)
5. Komal Singh (61837175)

Team Agreement

The team agreement is a contract that all team members have signed up to. It details the expectations each team has for its members:

- **We'll meet during lab time (12-2 pm on Tuesdays FIP 129)** and then divide the tasks of equal weight between group members while we are there.
- We have created a group chat on WhatsApp, and group members will respond to messages within 2 days.
- If a group member continuously does not do their work, we will try to speak with them about it, and if that doesn't work we will bring the issues to the TA/professor.
- Group members will keep the Kanban board up to date.
- When there is a pull request, we as a group will try to review the code within 1 day of the request.

- If any team member needs any assistance with a particular task, please communicate it with the rest of the group in the group chat as soon as possible, and someone will be able to help.
- We will work as a team. so we will all help each other when issues arise

Project Preference

- **The Event Ticketing System** (this is the only topic that works with our schedules)

Lab Section Preference

- **L07 is our preferred lab section.** It is also the only lab section that works with our schedules.

Planning Framework

- Set up your team's GitHub repository. Your repo name should be your team's name. (Done) ✓
- Add the URL of your repo in this submission (Canvas)
<https://github.com/trevorwinser/Infinite-Loopers.git>
- Create a folder in the repo called "Scrum meetings," and add all the templates for all the weeks. Fill out the template for the first week after your team has the first scrum meeting. (Done) ✓
- Create your product backlog and sprint backlog using the Kanban dashboard offered by GitHub. (Done) ✓
